

Flux:: Center – Download & Installation Manager

The Flux:: Center is our new software management application for installing our software, keeping track of software updates, and managing licenses on the Flux:: Matrix dongle (previously handled by the Security Manager software) on both Mac OS X and Windows.

WINDOWS USERS – IMPORTANT – PLEASE READ THIS!

Before using Center to install/uninstall anything, ALL current Flux:: / Ircam / Jünger software MUST BE UNINSTALLED manually through the Control Panel Add/Remove Programs.

Starting up Center

After installing Center and starting it up you will see this message:

“Retrieving Online Resources”

This means that Center is downloading image files and other resources from our servers, when it’s finished you will be able to start using Center.

Feedback / Bug Report

To send us feedback or report a bug, or anything else related, please click on the email symbol at the top of the Center window.

Keyboard Shortcuts / Software Information

Clicking on the question mark icon at the top of the Center window displays keyboard shortcuts and Center software information/credits.

Flux:: Matrix Dongle Manager

When using a Flux:: matrix dongle, the content of the dongle can be accessed and updated (when applicable) by clicking on the USB icon at the top of the Center window.

Center Preferences

To setup Center Preferences, click on the gear symbol located to the right at the top of the Center window.

Install Options

With the Install Options, Center can be configured to download and install only the selected options.

Available Options

VST 32/64 (Windows & Mac OS X)
AAX 32/64 (Windows & Mac OS X)
APP 32/64 (Windows & Mac OS X)
AU 32/64 (Mac OS X Only)
Waves WPAPI (Windows & Mac OS X)
VS3 (For Merging Pyramix) Windows Only

Software install paths (Windows only)

Provides the option to select the install path for the different software options, not available for AAX or Waves WPAPI.

Global Options

Offline Install Mode

This option is for installing software downloaded to Center's cache, using "Download Only Mode", on a computer that is not connected to the Internet.

Download Only Mode

This option is for downloading software to Center's cache without installing the downloaded software. The Center App bundle (Mac OS X) or Program Folder (Windows) can then be copied or moved to an external hard-drive or memory stick and moved to a computer that is not connected to the Internet, and the cached software can then be installed activating the "Offline Install Mode".

Add App Shortcuts

When installing applications, shortcuts are added to the software.

Beta Version

Gives access to public beta versions.

Beta Private

For accessing private beta versions, requires a login and password provided by Flux:: (Login to access private beta versions with "Beta Private Account").

Clear cache

Clean the Software cache for the current instance of Center.
